- WebkitBrowser plugin 3
- Security plugin 3

RDKServices changes in R4 (up to release 4.3)

- **DeviceInfo improvements**

The DeviceInfo plugin now supports getting the correct DeviceID for an AMLogic device

- **WebkitBrowser plugin**

Mutliple changes were made to the WebkitBrowser plugin (e.g. support for 2.38 API and InjectableBundle replaced by Extensions)

- **Security plugin**

For testing purposes of the security plugin a test token can now be used and no longer for these cases a fully generated token is required.
